Market Review

On fixed income, during MPC meeting in July, Bank Negara decided to raise the Overnight Policy Rate by 25 bps to 3.25%. The central bank cited "firm growth prospects" and above long-run average inflation as reasons for the hike. The OPR hike was already priced in and some market players pared back their expectations for another rate hike for the rest of the year. Buying by offshore players also helped drive MGS yields down and the reach for yield resulted in more interest in the longer end of the curve. The curve bull-flattened as a result. Foreign shareholding in MGS increased to 46.7% in June from 46.3% the previous month. The benchmark 3-year, 5-year, 7-year and 10-year MGS fell by 3 bps, 7 bps, 17 bps and 14 bps respectively to end the month at 3.47%, 3.66%, 3.75% and 3.88% respectively. There were two auctions in July. The RM3 bil re-opening of the 5-year MGS recorded a bid to cover of 2.18x at an average yield of 3.707% while the RM1.5 bil reopening of the 15-year GII garnered a strong bid to cover of 3.81x at an average yield of 4.393%. On the corporate side, yields fell by 3 to 15 bps while credit spreads were largely stable with the exception of the 10-year tenor which experienced some widening due to the rally in the 10-year MGS. This month, CIMB Thai, Aquasar (a special-purpose-vehicle of Sarawak) and Sentoria (guaranteed by Bank Pembangunan) issued.

On equity front, FBM100 Index slipped 0.21% to end at 12,651, underperforming MSCI Asia Pacific ex Japan Index which rose sharply by 3.3%. Among the headlines was the loss of MH17, reported to have been shot down by a missile, few months after MH370 incident. On the corporate front, CIMB, RHB and MBSB received approval from Bank Negara to begin talks for a possible merger. AirAsia X signed a MoU with Airbus, intended to buy 50 A330-900neo worth RM44bn at list price. Boustead proposed to acquire 70 acres of land in Pulau Indah for O&G support services. Besides, Boustead has formalized a RM9bn contract with the Ministry of Defence to build six second-generation patrol vessels for the Royal Malaysian Navy. IJM Land entered into a sale and purchase agreement with SP Setia to acquire 40% of Kuantan Pahang Holdings which holds a 51% stake in Malaysia-China Kuantan Industrial Park.

Market Outlook

As bonds have mostly priced in a higher domestic interest rate environment and tapering by the Fed while the European Central Bank is taking a more accommodative stance, we will gradually lengthen the fund's duration. In terms of asset allocation, we still prefer corporate bonds.

Despite the escalating tension in Iran as well as expectations on timing and speed of US rate-hike cycle, equities market globally continues to be supported by the strength in global economic recovery in US and Europe; and still accommodative policy in major countries. Investment team remains optimistic on Malaysia equities in the long run back by government continued effort to address macroeconomic issues and export-led recovery despite moderating domestic consumption. We will focus on stocks that are beneficiary as the economic growth gaining momentum at reasonable valuations.
