Market Review

Malaysian Government Securities ("MGS") saw heavy sell-off across the curve with yield rising by 1 to 12 bps on the back of global risk-off sentiments and turmoil in emerging markets ("EM") in Sept 2018. On a side note, Ringgit weakened slightly by 0.7% against the greenback to close the month at 4.1383. Foreign funds continued to be net sellers of MGS and Government Investment Issue ("GI") with outflows of MYR2.4 billion in Aug 2018. Foreign holdings in MGS and GI stood at 24.7% (July 2018: 24.8%), in line with global risk-off sentiments and investors' aversion to EM assets. On the economic data front, Bank Negara Malaysia kept the Overnight Policy Rate unchanged at 3.25% for the fourth consecutive meeting, on the back of low inflation and tempered economic growth expectations for the year.

The FBM100 Index fell 1.5% MoM in September on concerns over the US-China trade tensions. In terms of sectors, Construction and Property were among the key laggards. However, foreigners turned net buyers during the month with a net inflow of MYR66 million after four consecutive months of net selling. Foreign participation improved and accounted for 31% of the average daily trading participation in September, compared to 24% in August. Cumulative foreign net selling YTD amounted to MYR8.5 billion. On the corporate front, key news included the increase in Petronas' dividend payments to the government to MYR24 billion from the earlier guidance of MYR19 billion, Sapura Energy's proposed disposal of a 50% stake in its unit Sapura Upstream, and the stepping down of CIMB Group's chairman, Datuk Seri Nazir Tun Razak from his post and all other positions within the banking group by year end.

Market Outlook

In the near term, uncertainties surrounding domestic government policies, trade disputes between major economies and global monetary policy tightening remain. That being said, we believe the local bond market should be well supported on the back of solid domestic fundamentals and ample onshore liquidity.

The Malaysian equity market will likely remain volatile in the near term given the concerns over the ongoing trade tension between US and China and its implications on global growth. Locally, investors are watching out for Pakatan Harapan's policy execution and fiscal management. However, the new ruling coalition's promise of better governance, transparency and accountability should bode well for the domestic business environment and local equity market over the long term.

Replacement Disclosure Document dated 9 December 2016, First Supplemental Replacement Disclosure Document dated 26 January 2018, Second Supplemental Replacement Disclosure Document dated 11 May 2018, Third Supplemental Replacement Disclosure Document dated 30 July 2018 and Fourth Supplemental Replacement Disclosure Document dated 19 October 2018 of the AIA Private Retirement Scheme have been registered with the Securities Commission Malaysia, who takes no responsibility for their contents.
