Market Review

Malaysian Government Securities ("MGS") rallied across the curve and bull flattened in Aug 2019. This was in line with lower global yields on the back of global monetary policy easing outlook and further escalation in the US-China trade tension as market sentiment turned risk-on. MYR weakened by 1.91% against the greenback to close the month at MYR4.2055. MGS levels as of end-Aug 2019 were: 3Y at 3.15% (-14 bps), 5Y at 3.23% (-20 bps), 7Y at 3.28% (-27 bps), 10Y at 3.32% (-27 bps), 15Y at 3.48% (-32 bps), 20Y at 3.56% (-43 bps) and 30Y at 3.78% (-40 bps).

The FBM100 ("Index") fell 2.0% MoM in August, in line with the overall softness in the regional equity markets amid renewed worries over the US-China trade war and slowing global growth. The local Index outperformed the MSCI Asia Ex-Japan Index, which fell 2.37% in MYR terms over the same period. Foreigners were net sellers of the local market with a net outflow of MYR2.6 billion during the month, bringing year-to-date net outflow to MYR7.3 billion. On the corporate front, key news included Genting Malaysia's announcement of its acquisition of loss-making Empire Resorts, Press Metal's power purchase agreement with Syarikat SESCO Bhd for the supply of up to 500MW for its proposed smelter at Samalaju Industrial Park and Cabinet's announcement to reduce passenger service charge for international travellers who are flying beyond ASEAN from KLIA2 and other airports besides the KLIA from October 2019.

Market Outlook

Global geopolitical events continue to weigh on growth outlook and drive market volatility. As such, we expect global monetary policy accommodation to remain and this augurs well for fixed income assets. The bond market shall be further supported by ample liquidity in the financial system and attractiveness of yield relative to peers.

On the equity front, trade tension re-escalated when China retaliated with own tariffs on US goods and state buyers to stop purchasing US agricultural products. In addition, economic data generally continues to point to weak growth due to the global trade uncertainty. However, we are comforted that global central banks have turned more dovish and the Chinese government will be ready to implement more stimulus if needed to avoid a hard landing for its economy. Despite this, Malaysia remains under-owned by foreigners and has underperformed its regional peers on a year-to-date basis. We see potential support from the revival of infrastructure projects and potential relocation of activities to Malaysia as a result on the ongoing US-China trade spat.

Replacement Disclosure Document dated 9 December 2016, First Supplemental Replacement Disclosure Document dated 26 January 2018, Second Supplemental Replacement Disclosure Document dated 11 May 2018, Third Supplemental Replacement Disclosure Document dated 30 July 2018, Fourth Supplemental Replacement Disclosure Document dated 19 October 2018, Fifth Supplemental Replacement Disclosure Document dated 18 January 2019, Sixth Supplemental Replacement Disclosure Document dated 15 April 2019 and Seventh Supplemental Replacement Disclosure Document dated 24 August 2019 of the AIA Private Retirement Scheme have been registered with the Securities Commission Malaysia, who takes no responsibility for their contents.
