

AIA PAM – Islamic Moderate Fund

Investment Objective

The Fund seeks to provide returns through a combination of income* and capital growth from a portfolio that is consistent with Shariah principles.

*Income will be reinvested in additional Units in the Fund

Investment Strategy

The Fund will invest in a Shariah-compliant portfolio comprising equities with potential for growth and equities that are trading below their fair value. The Fund will also invest at least 40% of its NAV in Sukuk and Islamic money market instruments with a minimum credit rating of "BBB3" or "P2" by RAM or equivalent rating by MARC.

The Fund will only invest locally.

*Note: Change of performance reporting method from annualised to cumulative returns with effect from July 2020 to provide better clarity and follow common practice by industry players.

Market Review

Government Investment Issue ("GII") yield curve twist-flattened in Aug 2021 as domestic political scene dominated headlines during the month. Market sentiment improved after the new Prime Minister announced his cabinet line-up, which comprised of multiple cabinet ministers being reappointed, pointing to a continuity in government policies. Foreign funds continued to be net sellers of MYR debt securities in July 2021 with outflows of MYR3.6 billion. As a result, foreign holdings in Malaysian Government Securities ("MGS") and GII dipped to 25.3% (June 2021: 25.7%).

The FBMS ("Index") rose by 5.8% Month-on-Month ("MoM") to close at 12,750.46 pts on 30 August 2021. The Index outperformed the MSCI Asia Ex Japan Index, which only rose 0.50% MoM in Malaysian ringgit ("MYR") terms over the same period. In August 2021, foreign investors turned net buyers of RM1 bn of Malaysian equities while local institutional investors were the largest net sellers of RM1.5 bn.

Market Outlook

Given the two-speed recovery in the developed markets against emerging markets, we expect the former to lead in terms of policy tightening. Bank Negara Malaysia's policy measures should remain accommodative in the near term. Higher supply of sovereign sukuk should be well absorbed by the market, as we expect the additional supply to be concentrated at the short to belly of the curve. Overall, the domestic financial system liquidity remains flushed, which shall remain supportive of the sukuk market.

We remain optimistic of the local equity market given the positive development in the daily vaccination trend and some near-term clarity over the domestic politics with the appointment of our new Prime Minister and cabinet line-up. Downside risks to the market could stem from new Covid-19 variants and uncertainties from the domestic political landscape.
