Market Review

Malaysian Government Securities continued to strengthen in Feb 2019, on the back of risk-on sentiment in emerging markets following the positive development in the US-China trade war and dovish tone by US Federal Reserve. This was further supported by the rebound in Malaysia's 4Q18 GDP and stronger MYR, which saw buying interests mainly on the belly to the long end of the curve from both local and foreign investors. MYR strengthened by 0.7% against the greenback to close the month at MYR4.0658.

Similarly, the FBM100 Index rose 1.3% mom in February on the back of improved sentiment in the global markets. Average daily value traded picked up to about MYR2.1 billion from MYR1.9 billion a month ago. However, foreigners were net sellers of the local market with a net outflow of MYR0.8 billion during the month, bringing year-to-date net inflow to MYR0.2 billion. On the corporate front, key news included the commencement of talks between the Government and Gamuda on the acquisition by Government of four highway concessions, the termination of the MYR584.8 million contract awarded to Muhibbah Engineering by the Bintulu Port Authority, and indications from Communications and Multimedia Minister Gobind Singh Deo that there will not be further reductions in high-speed broadband prices in 2019.

Meanwhile, on the Asian equities front, China markets outperformed following the news that index provider MSCI is set to increase the weighting of China-listed shares in the MSCI Emerging Markets Index. Equity performance elsewhere in the region was more mixed however with strength in Taiwan offset by weakness in Indonesia.

Market Outlook

Globally, central banks are generally tilted towards a slight dovish tone, on the back of slowing growth momentum and tame inflation environment. Malaysia has also joined the pact in that the central bank recognises the increasing downside risk to growth while inflation is likely to be sustained, having posted a 1% growth in 2018. This may draw the appeal of local fixed income assets relative to risk assets, which balances concern of higher local government bond supply.

Locally, we see risks in Malaysian corporate earnings, the volatility in oil prices and the potential share overhang from divestment by Government funds. However, market should be supported by the positive newsflow on the US-China trade talks and the less hawkish US Federal Reserve, which should be supportive for Emerging Markets. As such, we will remain vigilant to the constantly evolving market conditions and will adjust our strategy accordingly.

Replacement Disclosure Document dated 9 December 2016, First Supplemental Replacement Disclosure Document dated 26 January 2018, Second Supplemental Replacement Disclosure Document dated 11 May 2018, Third Supplemental Replacement Disclosure Document dated 30 July 2018, Fourth Supplemental Replacement Disclosure Document dated 19 October 2018, Fifth Supplemental Replacement Disclosure Document dated 18 January 2019 and Sixth Supplemental Replacement Disclosure Document dated 15 April 2019 of the AIA Private Retirement Scheme have been registered with the Securities Commission Malaysia, who takes no responsibility for their contents.
