Market Review

Malaysian Government Securities generally strengthened towards the end of the year on the back of year-end rebalancing activities. Market traded in thin liquidity during the month amid the year-end holiday period and the lack of domestic catalyst. Buying interest was further supported by the strong MYR, which strengthened by 2.08% against the greenback to close the month at MYR4.091.

The FBM100 rebounded 1.9% MoM in Dec following a sharp decline in previous month. The local index however, underperformed the MSCI Asia Ex Japan Index, which jumped 4.2% in MYR terms over the same period. Foreigners were net sellers of the local market with a net outflow of USD292m during the month, bringing year-to-date net outflow to USD2.7bn. On corporate news, Westports announced that it has handled a record-breaking container volume of 10.8 mil Twenty-Foot Equivalent Units ("TEU") in 2019, Tenaga Nasional Berhad and Magnum received the notices of additional assessment received from Inland Revenue Board of Malaysia.

Meanwhile, the Asia ex Japan equities rallied in December as trade tension eased on signs that US and China are reaching a phase one trade deal. Additionally, the US has agreed to delay indefinitely the new tariffs that were set to take effect in December on Chinese imports and reduce the existing tariff on Chinese imports from 15% to 7.5%.

Market Outlook

Global growth and inflation are expected to remain modest, which means that central banks are likely to remain largely accommodative. While global geopolitical events will continue to dominate headlines, a more data-dependent monetary policy approach for major central banks is expected to drive rate volatility. Besides, JPMorgan GBI-EM Index has confirmed reduced weighting in local government bonds. That said, ample onshore liquidity and solid domestic macro fundamentals increase bond market resilience to potential headwinds or capital outflows.

On the equity front, trade tension between the US and China has de-escalated temporarily as the US President Donald Trump has stated that both parties have agreed to sign Phase 1 trade deal. Having said that, global economic indicators have showed signs of stabilization. Domestically, Malaysia remains under-owned by foreigners and has underperformed its regional peers on a year-to-date basis. We see potential support from the revival of infrastructure projects and potential relocation of activities to Malaysia as a result of the ongoing US-China trade spat. We will remain vigilant to the constantly evolving market conditions and will adjust our strategy accordingly.

Replacement Disclosure Document dated 9 December 2016, First Supplemental Replacement Disclosure Document dated 26 January 2018, Second Supplemental Replacement Disclosure Document dated 11 May 2018, Third Supplemental Replacement Disclosure Document dated 30 July 2018, Fourth Supplemental Replacement Disclosure Document dated 19 October 2018, Fifth Supplemental Replacement Disclosure Document dated 18 January 2019, Sixth Supplemental Replacement Disclosure Document dated 15 April 2019 and Seventh Supplemental Replacement Disclosure Document Dated 24 August 2019 of the AIA Private Retirement Scheme have been registered with the Securities Commission Malaysia, who takes no responsibility for their contents.
