Market Review

Malaysian Government Securities yield curve bear steepened during the month on concerns over supply risk and presumed higher fiscal deficit ratio following the announcement of an additional MYR35 billion Economic Recovery Plan stimulus package (“PENJANA”). Meanwhile, S&P revised Malaysia’s outlook to negative from stable as S&P expects Malaysia to face heightened risks of further deterioration in its fiscal settings, related to the Covid-19 pandemic, over the next 24 months. MYR strengthened by 1.39% against the greenback to close the month at MYR4.2863.

The FBM100 grew by 1.0% MoM on 30 June 2020, underperformed the MSCI Asia Ex Japan Index which rallied by 6.2% in MYR terms over the same period. Foreigners were net sellers of the local market with a net outflow of USD698m in June 2020, bringing total foreign outflow to USD3.8bn YTD. Meanwhile, the Asian equities had a strong rally in June as confidence on an imminent and strong economic recovery has increased and expectation that significant liquidity accumulated over the last few months will eventually be put to work and support growth asset performance.

Market Outlook

While Covid-19 pandemic will continue to linger until a credible vaccine is found, global central banks will remain largely accommodative in the monetary policy space while fiscal policy will remain expansionary in support of growth. Following the suppressed oil prices and re-escalation of US China tensions, we expect interest rate volatility will remain for the time being. Given the pre-emptive monetary and financial measures taken to support the domestic economy thus far, the measures should remain supportive to the local economy in the near term. With the widening fiscal deficit, a larger supply of government bonds will continue to weigh on the yield curve and steepness. That said, local bond market shall continue to be supported by ample onshore liquidity.

On the equity front, while the reopening of economies globally and the monetary easing measures taken by Bank Negara Malaysia are positive to the equity market, we remain cautious amid concerns over the risk of a sudden spike in new infections due to the relaxation of movement restrictions. If the situation worsens, the strategy would inevitably turn defensive due to potential downgrades in macro fundamentals and corporate earnings. We continue to look for buying opportunities in companies with good fundamentals and solid balance sheet to weather through this crisis.

Replacement Disclosure Document dated 9 December 2016, First Supplemental Replacement Disclosure Document dated 26 January 2018, Second Supplemental Replacement Disclosure Document dated 11 May 2018, Third Supplemental Replacement Disclosure Document dated 30 July 2018, Fourth Supplemental Replacement Disclosure Document dated 19 October 2018, Fifth Supplemental Replacement Disclosure Document dated 18 January 2019, Sixth Supplemental Replacement Disclosure Document dated 15 April 2019, Seventh Supplemental Replacement Disclosure Document Dated 24 August 2019 and Eighth Supplemental Replacement Disclosure Document dated 14 February 2020 of the AIA Private Retirement Scheme have been registered with the Securities Commission Malaysia, who takes no responsibility for their contents.
