Market Review

Malaysian Government Securities (“MGS”) rallied across the curve as sentiment turned risk-off following the emergence of the new coronavirus Omicron variant in South Africa. During the month, Bank Negara Malaysia (“BNM”) decided to keep the Overnight Policy Rate (“OPR”) at 1.75% at its last Monetary Policy Committee (“MPC”) meeting of the year. On the currency front, MYR weakened by 1.66% against the greenback to close the month at MYR4.2105. Foreign inflows accelerated in Oct to MYR2.9 billion (Sept 2021: +MYR0.6 billion) as foreign funds bought on the dips during the sell-off.

The FBM100 Index declined by 3.8% Month-on-Month (“MoM”) and underperformed the MSCI Asia Ex Japan Index and MSCI World, which declined by 2.2% in Malaysian ringgit (“MYR”) terms over the same period. In November 2021, foreign investors were net buyers of MYR0.1 billion of Malaysian equities.

Global equities also closed lower as investors jostled with forecasts of earlier than anticipated Fed tightening, coupled with concerns of ramping inflation and slowing growth on reopening worries on the new Omicron Covid-19 variant. By sector, technology was the only sector recording positive returns in November, while Consumer Discretionary, Energy and Financial were the biggest laggards.

Market Outlook

Given the two-speed recovery in the developed markets and emerging markets, we expect the former to lead in terms of policy tightening. Bank Negara Malaysia’s policy measures should remain accommodative in the near term and the domestic financial system liquidity remains ample, which shall remain supportive of the bond market.

As for equity, investors are currently watching the macro data closely to gauge the strength of inflationary pressure and the timing of a QE tapering. Investors will continue monitoring the Covid-19 situation following the recent resurgence in positive cases and the emergence of Omicron. That said, equities remain the preferred asset class given the expectation of bond yield resuming its upwards trend upon US Fed tapering in 2022. We prefer developed markets over emerging markets for now.
