### Market Review

Malaysian Government Securities (“MGS”) yield curve bull-steepened in April 2025. US trade policies under the new Trump administration amplified global market volatility and economic uncertainties, setting off a risk-off flight away from Equities and US assets including the US Dollar and US treasuries. This shift benefited other markets, including Malaysia’s fixed income market, as investors sought stability. Locally, expectations for a cut in overnight policy rate (“OPR”) by Bank Negara Malaysia (“BNM”) on growth concerns from external headwinds also drove MGS yields lower during the month.

US equities ended April on a muted note, with the S&P 500 index lower by 0.70%. Markets were initially shaken by Trump’s “Liberation Day” tariff announcement, raising trade war fears. However, sentiment improved after a 90-day pause in tariff implementation was announced, providing temporary relief. In the ASEAN equity space, the MSCI Asia ex-Japan index rose 0.5%, buoyed by optimism that US and China may soon resume trade negotiations.

The FBMKLCI (“Index”) gained 1.8% Month-on-Month (“MoM”) to close at 1,540 pts in April 2025. The Index outperformed the MSCI Asia ex Japan Index, which fell 2.2% MoM in Malaysian Ringgit (“MYR”) terms over the same period. Foreign investors remained net sellers of Malaysian equities with net sell flows eased by 59% MoM to MYR1.9 billion while local institutions remained net buyers amounting to MYR2.2 billion during the month.

### Market Outlook

The reciprocal tariffs unveiled by President Trump on Liberation Day was larger than market expectations. With the US effective tariff rate at above 20%, the economy is at higher risk of a recessionary or stagflation scenario, though there is still much uncertainty and room for tariffs negotiation. Domestically, the reciprocal tariff rate of 24% would most likely weigh on growth. Inflation impact would likely be muted, barring any upside risks to inflation from subsidy reform measures. Against this backdrop, BNM may join global central banks in monetary policy easing as a pre-emptive move to support growth. With uncertainties ahead, we maintain our view that market volatility would persist as market to be highly sensitive to further developments on tariffs and key economic data releases.
